Technical Skills

Languages: JavaScript, Java **21**, Python.

Web Technologies: React JS 18, Vue 3, HTML5, CSS3, Bootstrap 4, Tailwind CSS, Windi CSS, Node.js, Express.js.

Databases: MongoDB.

Frameworks: Apache Sling, OSGi, JCR, Adobe Experience Manager (AEM 6.5).

Platforms & Tools: Git, GitHub Desktop, Azure DevOps, Maven, Vite, Postman, Figma, Microsoft Azure (Image Processing with OCR), IntelliJ IDEA, VS Code.

GenAI & AI: ChatGPT, Claude, Gemini, GitHub Copilot, Prompt Engineering, AI-Assisted Development, LLM API Integration, AI Agent Development.

Professional Summary

- Software Engineer with **5+ years of experience** specializing in **Adobe Experience Manager (AEM)**, **MERN stack**, and **modern frontend development**, with hands-on expertise in **React.js**, **Vue.js 3**, **JavaScript**, **Node.js**, **Express.js**, **MongoDB**, **HTML5**, **CSS3**, and **Tailwind CSS** for building scalable and enterprise-grade web applications.
- Strong hands-on experience in **AEM 6.5** and **SPA development**, including **AEM component development**, **Sling Models**, **editable components**, **AEM authoring**, **content modeling**, and **frontend integration** for content-driven and customer-facing websites.
- Hands-on experience developing **full-stack MERN applications**, building **React.js interfaces**, **Node.js** and **Express.js backend services**, **RESTful APIs**, and **MongoDB data layers**, including frontend-backend integration, asynchronous workflows, data processing, and authentication.
- Experienced in developing **complex enterprise applications** and **reusable UI architecture**, including **flight booking workflows**, **campaign platforms**, **data-intensive tables**, **interdependent API workflows**, and **30+ reusable frontend and AEM components**, with a focus on scalability, maintainability, and performance.
- Proficient in translating **Figma wireframes** and **UI designs** into **responsive, pixel-accurate web interfaces**, implementing reusable components and ensuring consistency across desktop and mobile experiences while collaborating with designers and stakeholders.
- Key contributor to the **Malaysia Airlines website**, delivering **AEM and frontend enhancements** including the **New Booking Widget UI Revamp**, **chatbot integration**, **MHExplorer**, and **FlySiswa**, along with integrating **third-party and cloud services** such as **Microsoft Azure OCR** and resolving critical production issues.
- Experienced in **Agile/Scrum**, **code reviews**, **deployments**, **production support**, and **AI-assisted software development**, leveraging **Generative AI** and **LLM-based tools** to improve development productivity, debugging, and code quality.

Experience

IBM Pvt Ltd

Oct 2020 – June 2021

Client: (Internal Project) Software Engineer (React.js / MERN)

- Developed and enhanced **full-stack web application features** using the **MERN stack**, with hands-on development across **React.js**, **JavaScript (ES6+)**, **Node.js**, **Express.js**, and **MongoDB**.
- Built **reusable React.js components**, **responsive user interfaces**, and **RESTful API integrations**, while developing backend services using **Node.js** and **Express.js** for application workflows and data processing.
- Implemented **MongoDB data operations** and **frontend-backend integration**, ensuring efficient data handling, maintainable application architecture, and reliable feature delivery.

Kyndryl Pvt Ltd

June 2021 – July 2022

Client: (Internal Project) Software Engineer (React.js / MERN)

- Developed **end-to-end web application features** using **React.js** and the **MERN stack**, contributing to both frontend interfaces and backend services using **Node.js**, **Express.js**, and **MongoDB**.
- Designed and developed **reusable React components** and **complex UI workflows**, integrating multiple **RESTful APIs** and handling asynchronous data flows between frontend and backend services.

*Client: (Malaysia Aviation Group – MAG)**AEM Frontend Developer (Vue.js 3 / CSS / AEM)*

- Designed and developed **scalable, responsive Single Page Applications (SPAs) and websites** using **AEM, Vue.js 3, JavaScript, HTML5, and CSS3** for high-traffic airline platforms.
- Developed and enhanced **customer-facing websites and user interfaces** for **flight booking systems, campaign management platforms (FlySiswa, MHExplorer, MHSports), RefX booking flows, and Inflight Menu services**.
- Built and optimized **reusable Vue.js components, AEM components, and frontend modules**, improving **code maintainability, reusability, and content delivery** across large-scale enterprise websites.
- Developed and integrated **AEM components, Sling Models, and Vue.js frontend components**, enabling seamless content delivery between **AEM-authored content and SPA frontend experiences**.
- Integrated **RESTful APIs and third-party services** with Vue.js websites, including **Microsoft Azure OCR integration for image processing and text extraction**.
- Improved **website performance and user experience** by optimizing **Vue.js components, API calls, page rendering, and loading behavior**, enabling faster and smoother user interactions.
- Led the **modernization of legacy websites**, migrating to an **AEM SPA architecture using Vue.js** while maintaining functionality and improving maintainability.
- Developed **frontend features for web and mobile platforms**, including user interfaces and integrations for **notifications, promotions, and campaign experiences**.
- Resolved **critical production issues**, reduced defects, and improved **website reliability and production stability** through effective troubleshooting and root-cause analysis.
- Collaborated in **Agile/Scrum environments**, contributing to **sprint planning, feature development, code reviews, deployments, and production support**.

Education

Bachelor of Technology in Electronics and Communication Engineering**2020***Bhimavaram, Andhra Pradesh*

Achievements Awards

- Received the **On-the-Spot Award twice at TCS** for outstanding performance, timely delivery, and effective resolution of critical technical issues.
- Received the **Star of the Month Award once at TCS** for exemplary performance and significant contribution to project deliverables.
- Received the **Best Team Award once at TCS** for strong collaboration, technical contribution, and successful project delivery.
- Received the **Elevate Wings Award at TCS** for successfully clearing the **Wings 1 certification/assessment**, demonstrating technical proficiency and continuous professional development.
